

GS10867: Charting a New Course – Carbon Insetting Program

Dated 30th Oct 2020

Design Certification

SustainCERT, hereby certifies that GS10867 Charting a New Course – Carbon Insetting Program is a Gold Standard Design Certified Intervention applying the Gold Standard Principles & Requirements and The Value Chain Intervention Guidance.

The planned SDG impacts are shown overleaf. The accompanying Certification documentation can be found on the Gold Standard Impact Registry as follows:

<https://registry.goldstandard.org/projects/details/2824>

Planned Impacts

SDG 13: Climate Action

Details of the approaches, limitations, assumptions and other considerations can be found in the IDD's and SustainCERT Validation Report on the Gold Standard Impact Registry.

ADDITIONAL PLANNED SDG IMPACTS

SDG	SDG Target and Indicator	Details
	<p>Target 2.4 By 2030, ensure sustainable food production systems and implement resilient agricultural practices that increase productivity and production, that help maintain ecosystems, that strengthen capacity for adaptation to climate change, extreme weather, drought, flooding and other disasters and that progressively improve land and soil quality.</p> <p>2.4.1, proportion of agricultural area under productive and sustainable agriculture</p>	<p>Cover cropping and no tillage practices will increase the number of acres adopting productive and sustainable agriculture</p>
	<p>Target 6.6, protecting and restoring water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers and lakes.</p>	<p>Cover cropping and no tillage practices will reduce nitrate run off and increase the number of acres adopting productive and sustainable agriculture</p>
